

## Dr. Patricia Cline

Dr. Cline graduated from Logan College of Chiropractic in 2005. Prior to becoming a Doctor of Chiropractic, Dr. Cline was a Licensed Massage Therapist, the owner and operator of a shoe repair business and a zoo keeper!

Dr. Cline grew up on a farm in Kansas where she loved big trail rides on horseback with family and friends. She has 3 children, 7 grandchildren and 1 great grandchild. She settled in Maine because: "I feel happy here!"

She is a member in good standing of the American Chiropractic Association, the Maine Chiropractic Association and the International Chiropractic Pediatric Association.

## What You Can Expect

Cline Chiropractic provides state of the art chiropractic analysis and treatment. Dr. Cline will consult with you about your health, perform an examination to identify your problem areas, discuss her findings with you, answer any questions you may have, and set up a treatment plan that is just right for you.

## Patient Information

Patients are asked to arrive 15 minutes early for their initial appointment to allow adequate time for the completion of new patient paperwork. If your chief complaints are the result of an auto accident or work related injury, please let us know.

## Insurance & Billing Information

We participate with Medicare and most insurance companies. Our billing office will submit charges to your insurance company on your behalf. Co-payments, co-insurances, non-covered services, and deductibles that have not been satisfied, are the responsibility of the patient.

We do encourage you to contact your insurance carrier should you have questions regarding your chiropractic coverage and benefits.

If your insurance company requires a referral this must be present at the time of service. Please contact your primary care provider to arrange for an insurance referral, if required. For those patients not covered by insurance, we strive to make our chiropractic care affordable.

*Our goal is to restore your body's balance and function and to correct the underlying cause of your symptoms with treatments that are as painless as possible.*

Patricia Cline

Doctor of Chiropractic

*Detecting and correcting small problems  
before they become big ones!*

## Do I Need a Chiropractor?

Chiropractic care is an important health choice. It ranks with good lifestyle choices such as brushing teeth, walking for exercise, wearing a seatbelt and getting enough sleep. Chiropractic adjustments remove interference and promote normal movement and normal living function.

## Why Choose Us?

Cline Chiropractic offers our patients prompt, professional and effective treatment. We are honored that existing *patient referrals continue to be our number one referral source* for new patients.

## State of the Art Chiropractic Analysis and Treatment

Cline Chiropractic uses the latest technology from Sigma Instruments to *detect and correct your small problems before they become big ones.*

Cline Chiropractic Center chiropractors focus on the relationship between your structure (primarily the spine) and your function (as coordinated by the nervous system) and how that relationship affects the preservation and restoration of your health.

## State of the Art SIGMA Instrument Method

Cline Chiropractic uses the new high tech impulse adjustment technique and equipment developed to provide analysis and controlled treatments to specific areas. Every visit includes a brief computer evaluation that produces graphs of your function.

The computerized impulse adjustment technique feels like a light tapping sensation on the area that is being treated. There is no popping or cracking with the treatment. In most cases, the treatment is painless and after adjustments patients feel relief from their pain and have improved mobility.

## Where does chronic pain come from?

- Brain pain receptors that have become sensitive to adrenalin (stress), weather change and sudden movements can trigger pain symptoms.
- Old injuries from sports or accidents can cause frequent flare-ups, especially when aggravated by a new activity.

## What does the adjustment do for me?

- Chiropractic adjustments remove interference and restore more normal function to nerves, joints and soft tissues.
- Mechanical impulse adjustments reset tissue tension to correct frequencies; correct tension allows correct movement and correct function.

## Why use a computer?

- The computer measures the tension frequencies in the tissues that move the body.
- Excessive tension that is not appropriate for your current activity can restrict normal cell recovery and inhibit normal movement.
